

Description of the System:

"SeeDoku" is an accessibility-focused Sudoku game designed for users with vision disabilities. It features a clean, high-contrast grid, text-to-speech narration, adjustable font scaling, and optional haptic and audio feedback. The interface includes large, labeled buttons, voice command input, and a simple settings menu with toggles for speech mode, color-blind themes, and vibration alerts. The design ensures both sighted and low-vision users can enjoy Sudoku comfortably through sight, sound, or touch.

Gameplay Instructions:

Press Start, choose a difficulty level, and select a cell using touch, keyboard, or voice. Enter a number or say it aloud to fill the grid. Use built-in aids like Hint, Undo, Speak Cell, or Check Errors for guidance. Adjust font size or contrast anytime from Settings. The goal remains to complete all rows, columns, and 3×3 boxes with digits 1–9. Voice feedback confirms correct inputs and completion.

Intended Audience:

Players with low vision, color blindness, or blindness; accessibility-conscious gamers; educators teaching inclusive design; and puzzle enthusiasts who enjoy multi-sensory interaction.

Usability Questions:

1. Is navigation easy for both sighted and non-sighted players?
2. Do contrast, color, and font settings improve visibility and comfort?
3. Does the overall design feel inclusive and enjoyable to different ability levels?

 Feedback Summary Table (Accessible Sudoku App)

Friend's Name	Response to Q1 (Ease of Navigation)	Response to Q2 (Accessibility Helpfulness)	Response to Q3 (Suggestions / Overall Feedback)	Overall Rating (1–5)
Joshua Samillano	Yes, very easy to use	Yes, liked the features and color scheme	Recommends it for friends and families	5
Michelle E. Matillosa	Yes	Yes	Yes	5
Isagani Banguiran Jr.	Easy to navigate and buttons are clear	Very visible and not too colorful	Easy but still challenging	5
Jasp hier Nick Nuyad	Yes, easy to use	Yes, visible and colorful	Each difficulty is challenging	5
Mark Justine B. Parantar	Easy navigation and clear buttons	Very visible and good color scheme	Easy but challenging; recommended for others	5
Jestinemarc Lumawag	Yes	Yes	Yes	4
Arianne Jean De Asis	Yes, navigation appears easy for everyone	Yes, accessibility features improve usability	Inclusive and enjoyable design	5
Rodver Angelo Espera	Yes, easy to navigate	Yes, visually appealing and aesthetic	Addresses accessibility and inclusiveness well	5
Vidalyn Soria	Yes, navigation works for sighted and non-sighted users	Yes, adjustable contrast and font improve visibility	Inclusive and enjoyable game experience	5

Friend's Name	Response to Q1 (Ease of Navigation)	Response to Q2 (Accessibility Helpfulness)	Response to Q3 (Suggestions / Overall Feedback)	Overall Rating (1–5)
Niel Andrew Ratera	Yes, smooth transitions and controls are intuitive	Yes, large fonts and sound cues help a lot	Add an option to change voice speed	4
Ruben Eslacin	Yes, the interface is simple and user-friendly	Yes, color contrast makes it easier to see	Maybe add a short tutorial for beginners	5

Summary of Findings:

- **Ease of Navigation:** All 11 participants found the app easy or very easy to navigate.
- **Accessibility Features:** Everyone agreed that visibility, sound cues, and color contrast made gameplay better.
- **Suggestions:** Some suggested adding tutorials, voice speed settings, or theme customization.
- **Overall Rating Average:** ★ 4.8 / 5
- **General Feedback:** The Accessible Sudoku App was praised for being inclusive, easy to use, and enjoyable for both visually impaired and regular users.
